The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply							
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

- 1. This application has been examined.
- 2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 3. Claims 1, 3, 7, 9, 13, and 15 are rejected under 35 U.S.C. 102(e) as being anticipated by Kupiec (6533822).
- 4. Regarding claim 1, Kupiec shows a computer implemented method comprising: retrieving a plurality of element properties corresponding to a plurality of elements, wherein the elements are adapted to be displayed on a display device, and wherein the element properties for each element includes a unique tab order number (Fig. 3, 5, column 3 lines 30-50); positioning the selected elements in a display buffer in order of the element's tab order number, so that elements with lower tab order numbers are positioned towards the top of a display and elements with higher tab order numbers are positioned towards the bottom of the display and rendering the display buffer on the display device (column 7 lines 1-25).

Application/Control Number: 10/770,284 Page 3

Art Unit: 2174

5. Claims 7 and 13 show the same features as claim 1 and are rejected for the same reasons.

- 6. Regarding claim 3, note that the tab order number indicates a sequence a cursor moves from one element to another when the tab key is pressed (column 6 lines 50-63, column 7 lines 1-30).
- 7. Claims 9 and 15 show the same features as claim 3 and are rejected for the same reasons.
- 8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 9. Claims 2, 8, 14, 19-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kupiec (6533822) and Milic-Frayling et al (2004/0100510).
- 10. Regarding claim 2, in addition to that mentioned for claim 1, Kupiec does not go into the details of determining that the display device is a constrained display device and positioning fewer elements in a horizontal orientation to one another and more

Application/Control Number: 10/770,284

Art Unit: 2174

elements in a vertical orientation to one another than if the display device was not a constrained display device, but does mention positioning text to match the display properly. Furthermore, Milic-Frayling et al do show determining that the display device is a constrained display device and positioning fewer elements in a horizontal orientation to one another and more elements in a vertical orientation to one another than if the display device was not a constrained display device, for positioning text to match the display properly (Figures 1, 2, 6, para 28, 33, 42, 51). It would have been obvious to a person with ordinary skill in the art to have this in Kupiec, because it would position text to match the display properly.

Page 4

- 11. Claims 8, 14, and 19-21 show the same features as claim 2 and are rejected for the same reasons.
- 12. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

13. Claims 13-18 and 21 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. These claims are directed to a computer program product which is not statutory.

Application/Control Number: 10/770,284

Art Unit: 2174

14. Claims 4-6 and 1-12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. These claims bring out altering, detecting, and saving tab features which combined with all the features through dependency together are not set forth in the prior art of record. Also, these claims do not have the 101 issue.
